Installing DevC++

Double click on the setup, devcpp4.9.9.2_setup.exe. You will see a few screens that ask you to pick a language (English) and to agree to the license terms.
Choose a "typical" installation.

Accept the suggested destination for the installation:

Many subdirectories and files are extracted to the destintion:

Answer "yes" when it asks if you wish to install Dev-cpp for all users. **Note:** if the installation fails, re-install and try "no" for this.
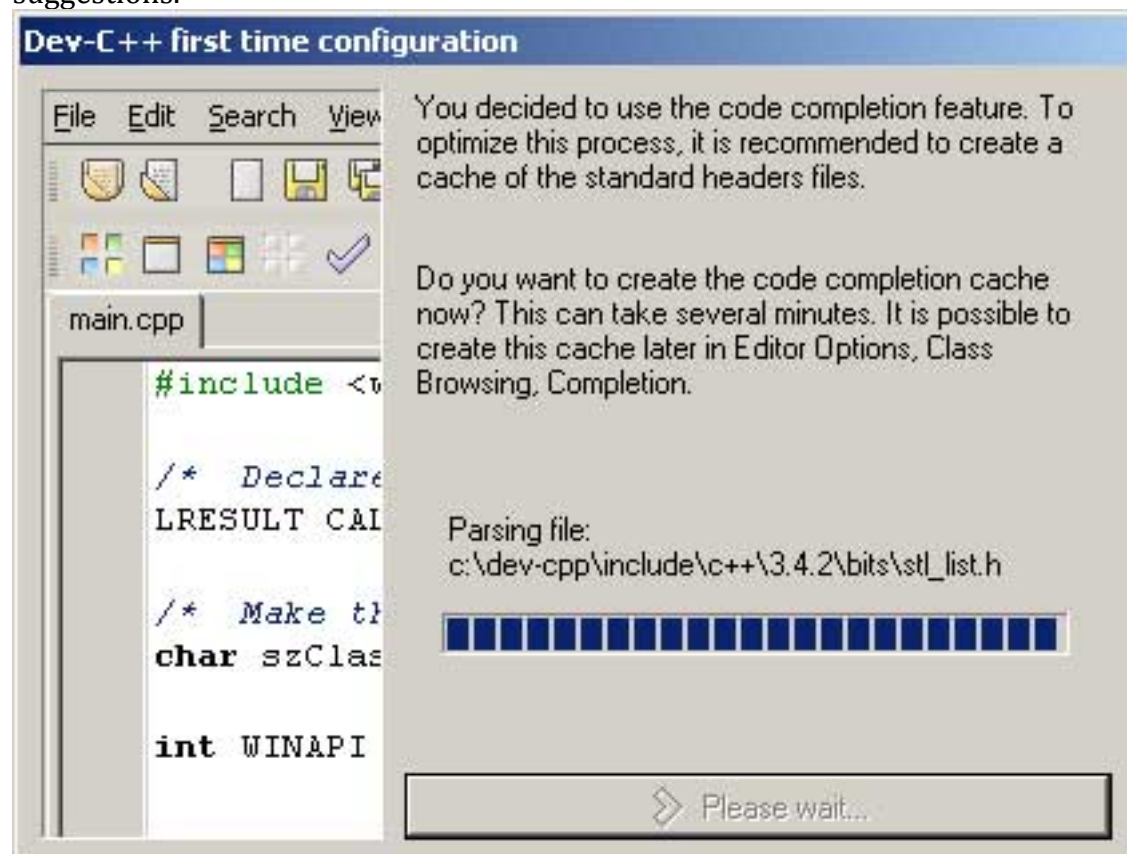

A screen says the installation is complete:

Keep the check mark in the box. Click on "Finish". A first-time configuration screen appears:

Pick "English" and "New Look". In the next several screens, hit "Yes" for its suggestions.

Eventually you are done. Click "OK".
